SUMMARY

AI & ML-focused Computer Science student with experience in developing end-to-end intelligent systems using LLMs, knowledge graphs, and machine learning pipelines. Skilled in Python, data analytics, and scalable data workflows, with projects involving Neo4j, vector search, and real-time AI applications. Proven leadership as a GDG Campus Co-Lead and hackathon finalist, with a strong foundation in data structures, algorithms, and software engineering principles.

SKILLS

Programming: Python (Proficient), SQL

AI / Machine Learning: TensorFlow, Pandas, NumPy, Matplotlib, Gemini API, Concepts: Machine Learning (Regression, Classification, Clustering)

Data Operations & Quality: Ground Truth Data Preparation, Data Labeling & Annotation, Dataset Cleaning & Validation, Quality Auditing & Error Detection, SOP Compliance & Task Documentation

Databases: Neo4j, MySQL, Firebase Realtime Database

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Android Studio

Concepts: Data Structures & Algorithms, Object-Oriented Programming, Statistics (Basic), Probability

Experience

AI Data Annotation Intern – Ethara AI, Feb 2026 – May 2026

- Performed image and video annotation, AI output evaluation, and QA tasks following SOPs for accuracy and consistency.
- Reviewed submissions for instruction adherence, annotation quality, and error documentation.

PROJECTS

Smart Market Analysis

- Engineered an end-to-end multi-agent system for querying a Neo4j knowledge graph built from structured and unstructured datasets.
- Implemented LLM-based entity extraction and vector search to derive contextual insights from large-scale data.
- Developed an interactive analytics interface using Gradio to enhance visualization and user interaction.
- Designed scalable data processing workflows and ensured reproducibility through well-documented ML pipelines.

AI-Based Logic Depth Predictor

- Processed and cleaned 10,000+ structured data records using Pandas for machine learning model training.
- Performed feature engineering and dataset validation to improve prediction accuracy.
- Built a machine learning pipeline using Scikit-learn to analyze logical patterns and predict logic depth.
- Conducted exploratory data analysis (EDA) to identify important features influencing prediction.

Tech Stack: Python, Pandas, Scikit-learn, NumPy, Jupyter Notebook, Machine Learning

LEADERSHIP & COMMUNITY EXPERIENCE

Campus CO-Lead — Google Developer Group (GDG) – GNIOT, Sep 2024 – Sep 2025

- Selected among 500+ applicants to lead the campus developer community
- Organized 10+ technical workshops and training sessions on software development and emerging technologies
- Coordinated event logistics, speaker sessions, and technical knowledge sharing initiatives

CO-Organizer — Kotlin User Group (KUG) Gurugram, Jan 2025 – Present

- Co-organized city-level developer meetups in collaboration with Google and JetBrains
- Facilitated collaboration between students, developers, and industry professionals

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering (AI&ML)

Greater Noida Institute of Technology (GNIOT), Greater Noida, India

Expected Graduation: May 2026 , Merit Scholarship (FW) — 100% Tuition Fee Waiver

CGPA: 7.76 (till 7th semester)

ACHIEVEMENTS

- Merit Scholarship — 100% Tuition Fee Waiver (U.P Government)
- Finalist — Google Girls Hackathon 2025 (Selected among 60,000+ participants)
- Semifinalist — Microsoft Imagine Cup 2024
- Selected — Google Solution Challenge Bootcamp 2024
- Shortlisted — Google India Student Launchpad Program 2025
- Solved 120+ Data Structures & Algorithms problems across coding platforms
- Scored 99/100 in Mathematics in Class XII Board Examination

CERTIFICATIONS

- Google Machine Learning Crash Course — Google
- Generative AI Fundamentals — Microsoft
